

INTRODUKTION TIL ERIC

The Education Resource Information Center

Den mest omfattende internationale videnskabelige database inden for det pædagogiske område

ERIC er en meget anderkendt internationale database og dækker det pædagogiske område meget bredt. Af vigtige områder kan nævnes:

- didaktisk og pædagogisk forskning
- børne- og ungdomsopdragelse
- undervisning og specialundervisning
- voksenundervisning og uddannelsesforskning

Databasen indeholder henvisninger til tidsskriftsartikler, bøger, konferencepapirer m.m. En del af tidsskriftartiklerne er peer-reviewed, det vil sige, at andre forskere inden for samme felt har evalueret artiklerne og blåstemplet dem som videnskabelige.

Fakta

ERIC er en international bibliografisk database med hovedvægten på USA. Den indeholder mere end 1.5 millioner henvisninger med abstracts og mere end 337.000 artikler i fuld tekst. Derudover bliver du henvist til VIA bibliotekernes øvrige fuldttekst abonnementer via ikonet . Alle andre artikler kan bestilles på dit lokale VIA Bibliotek.

Artiklernes udgivelsesår strækker sig fra 1966 til i dag.

Søgesproget er engelsk.

Trunkering

? = erstatter ét bogstav i søgeordet (wom?n søger på women og woman)

* = søger på alle endelser og bøjninger af søgeordet (read* søger på read, reads, reader, reding m.m.)

Søgeordene indtastes i søgebjælkerne.

AND, OR, NOT
Du kan kombinere dine søgeord ved at anvende operatorerne:

AND: henter artikler, der indeholder alle de udvalgte søgeord.

OR: henter artikler, der indeholder mindst ét af de udvalgte søgeord.

NOT: henter artikler, der kun indeholder det første søgeord men ikke det sidste.

Identifiers: Iran

Abstract: The purpose of this study was to investigate the relationship between classroom management styles of the teachers and their academic optimism. In this study, three types of classroom management styles (interventionist style, interactionist style, and non-interventionist style) have been considered. Research community is all public primary school teachers in the Isfahan province in academic year 2014-2015. The sample size was calculated using the formula of Cochran 384. It is a multi-stage cluster sampling method. Classroom management style has been calculated using standard questionnaires of classroom management style of Wolfgang and Glickman (1986). The academic optimism variable was evaluated using academic optimism questionnaire of A. Hoy, Tarter, and W. Hoy (2006) in a sample of 384 teachers. The results showed that there is a significant relation between classroom management style of the teachers and their academic optimism and the correlation coefficient equal to 39% was obtained and the correlation coefficient of 47% was obtained between the academic optimism and non-interventionist classroom management, and the correlation coefficient of 43% was obtained between the academic optimism and interactionist classroom management, and the correlation coefficient of 24% was obtained between the academic optimism and interventionist classroom management that is significant. According to the results, the classroom management style is a variable that has relation with academic optimism and at academic opportunities it must be emphasized.
